The cold snap made the track look good. In reality, however, it was as hard as iron and very lumpy on the turns and on the many owners with horses with bad legs were scratched from many of the races.

The notice which the Guttenburg Associahorses or remove them from the track had a wholsome effect, and it was the means of unproving the size of the fields considerably. The quality was not very good, but the en-

tries were well matched and promised fair racing.

There was a good thing in the opening event, a dash of six furlongs for two-year-olds. The good thing was Emperor Otho and and he "as played all over the city by D. T.

The colt never ran a decent race in heavy going, and the hard, dry track to-day was probably responsible for his improvement.

The second race went to an outsider, buke John, a 20 to 1 shot. This improvement was also due to the hard, dry going.

When Pietz got to the dock there was nothing in sight. The water is about forty feet deep there and the tide was very strong. Pietz gave the hat to the watchman on the pier, who came running up when he heard the scream, and the watchman turned the hat over to Park Policeman Adolph Kine, who took it to the Centrai Park Arsenal.

No one had called at the East Eighty-eighth street police staid on this morning to make inquiries for a missing woman, nor had any one visited the arsenal to identify the hat.
